GRIFFITH COLLEGE DUBLIN

Assignment Cover Sheet

Student name: Toluwani Aderibigbe

Student number: 3050667

Faculty: **Computing Science**

Course: BSCH **Stage/year:** **4**

Subject: Mobile Development

Study Mode: Full time YES Part-time _____

Lecturer Name: Tracey Cassells

Assignment Title: Milestone 1 Travel Journal App

No. of pages: 9 pages

Disk included? Yes _____ No _____

Additional Information: (ie. number of pieces submitted, size of assignment, A2, A3 etc)

Date due: 9/11/2025

Date submitted: 1/11/2025

Plagiarism disclaimer:

I understand that plagiarism is a serious offence and have read and understood the college policy on plagiarism. I also understand that I may receive a mark of zero if I have not identified and properly attributed sources which have been used, referred to, or have in any way influenced the preparation of this assignment, or if I have knowingly allowed others to plagiarise my work in this way.

I hereby certify that this assignment is my own work, based on my personal study and/or research, and that I have acknowledged all material and sources used in its preparation. I also certify that the assignment has not previously been submitted for assessment and that I have not copied in part or whole or otherwise plagiarised the work of anyone else, including other students.

Signed: _____Ade_____ **Date:** ____1/11/2025_____

Please note: Students **MUST** retain a hard / soft copy of **ALL** assignments as well as a receipt issued and signed by a member of Faculty as proof of

Student Name: Toluwani Aderibigbe

Student ID: 3050667

Course: BSc (Hons) in Computer Science

Module: Mobile Development

1. Project Overview

The Personal Travel Journal App is an Android application developed in Kotlin using Jetpack Compose. It allows users to record and manage travel destinations in an interactive and organized way. The app provides a modern and simple interface where users can view, add, and explore destinations. It will later integrate GPS and sensors for location tracking and activity logging.

This app was chosen for its balance between creativity and functionality, allowing me to demonstrate key Android development skills while designing a user-friendly experience.

2. Objectives

- To design and implement a clean user interface with Jetpack Compose.
- To create a navigation system connecting multiple screens: Welcome, Destination List, and Add Destination.
- To ensure smooth navigation using Navigation Compose.
- To prepare the app structure for future milestones (sensor and database integration).

3. System Components

Component	Description
Welcome Screen	Introduces the app and includes a “Start Exploring” button to navigate to the main destinations page.
Destinations Screen	Displays saved travel destinations with an option to add new entries.
Add Destination Screen	Allows the user to input and save new destinations.
Navigation.kt	Manages transitions between screens using Jetpack Navigation Compose.

4. Sensor and Feature Plan

- **GPS Sensor:** Will be added in Milestone 2 to log travel locations.
- **Accelerometer:** Planned for detecting motion or step count during travel.
- **Local Storage:** SQLite or Room Database will be used in Milestone 3 for offline persistence.

5. Screenshot Placeholders

- **Figure 1:** Welcome Screen layout

Save Destination

6. Reflection

This milestone successfully established the base app structure, connected screens with Compose Navigation, and implemented placeholder UIs for interaction. The process improved my understanding of modern Android development with Kotlin and Compose.
